Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 20-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase “wherein the first pillow is coupled to the first pillow” renders claim 20 unclear and indefinite. Applicant must clarify.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 3636

Claims 1-2,7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ezell. Ezell shows the use of a children's pillow (39) central region (43) having a first (42) and second (45) lateral wing extending therefrom long with a neck support region (46) and head support region (Fig. 10). Ezell shows a retainer (47) adapted to mount the children's pillow.

3. Claims 1-4, are rejected under 35 U.S.C. 102(b) as being anticipated by Roston. Roston shows the use of a children's pillow (16) central region (20) having a first (22L) and second (22R) lateral wing extending therefrom long with a neck support region (24) and head support region (21). Roston shows a retainer (27) adapted to mount the children's pillow.

4. Claims 1-2,9-18,20-25 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by McNeil. McNeil shows the use of a children's pillow (30,60) central region (20) having a first panel coupled to a second panel (see col. 5 lines 30-31 and 55-57) which sandwiches a third and fourth panels. Each panel has either a first and second lateral wing (appendage) or a respective right and left appendage (see Figs. 2 and 6) that are mounted together, respectively to the other appendages of the panel and extending from the central along with a neck support region and head support region. McNeil shows a retainer (32) or fastener (which slidably fastens the pillow) to a seat. McNeil further shows that right and first appendages form a first cavity while the left and second appendage form a second cavity (Fig. 6) which may be stuffed (col. 3 lines 25-26) or inflated.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3636

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 9-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ezell in view of McNeil. Ezell shows all of the teachings of the claimed invention except the use of first, second, third and fourth panels to create first and second cavities for being stuffed. McNeil teaches the use of first, second, third and fourth panels to create cavities (see above rejections) for being stuffed. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify, the pillow of Ezell with the teachings of McNeil in order to allow for better comfort and support to a user.

Allowable Subject Matter

7. Claims 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
